

Hi,

I am writing to express my interest in the Senior iOS App Developer role. I am a seasoned iOS Developer with over three years of experience and a Bachelor's degree in Computer Science.

Your job posting resonates with my core beliefs as a developer. I am well-versed in Apple design principles and have a proven track record of crafting efficient and user-friendly interfaces. I am proud of my work and I consistently ensure my code is documented, and well tested.

Working independently and taking the initiative to find solutions has been a crucial part of my development strategy. I relish the opportunity to own my tasks, create timelines, and work towards achieving established goals.

Throughout my career, I have gained substantial experience with Swift, SwiftUI, UIKit, Storyboards, CocoaPods, Fastlane, MVC and MVVM, along with a solid foundation in Unit Testing. These skills, paired with my knack for problem-solving, make me confident in my ability to develop an exceptional iOS app for Arise.

Here are links to the most recent apps I have developed:

- PureStrength: <https://apps.apple.com/gb/app/purestrength/id1621267448>
- DeepBarbell: <https://apps.apple.com/gb/app/deepbarbell/id6446192009>
- Blink by VisioLab: <https://apps.apple.com/us/app/blink-by-visiolab/id1611543725>

Each app showcases my ability to create polished and user-friendly iOS apps that meet the demands of users and surpass client expectations.

Thank you for considering my application.

Sincerely,  
Madhav Thakker
